

You're Invited...

Brown's Creek Watershed District invites you to an Open House...

What's Stressing Our Stream?

The fish and insects in Brown's Creek are not doing as well as they should. A recent study has shown us why.

When: Monday, April 27th 4-7 PM... drop by anytime!

Where: Family Means – 1875 Northwestern Avenue South, Stillwater

Why:

- Learn about what's stressing our stream*
- Give us your thoughts – What water quality problems do you see?*
- See real insects found in Brown's Creek*
- Learn about gardens that look beautiful and help Brown's Creek*

Partners: Washington Conservation District, MN Pollution Control Agency, MN Department of Natural Resources, University of MN and local municipalities

This open house is part of the public input process for the Brown's Creek Impaired Biota Total Maximum Daily Load (TMDL) Study.

RSVP appreciated, but not required

To RSVP or for more information, contact Karen Kill, Brown's Creek Watershed District 651-275-1136 x26 or Karen.kill@mnrwcd.org
